EDITOR' TALK

In the digital world, competitiveness depends on the development of innovative products. Small, medium, or large-sized enterprises must apply new technologies to create competitive advantages and access to industrial marketplace. Being successful innovative leadership in the digital age is to create brand recognition and catch up with technology. This is the principal reason why most leaders, executives, investors as well as entrepreneurs in the industries should have known.

Brandex Directory, a professional marketing consultant who offers a suggestion to industrial enterprises in Thailand for business development and creates marketing solutions in order to expand Thai industries to domestic and international markets with modern technologies and innovations.

We continually develop cutting-edge technologies, especially an augmented reality (AR) application called PI MAR; a new innovation applied to printed media, makes ads alive with 3D models on a screen along with voice ads function. Furthermore, we combine this magazine "AEC GATEWAY", a source of information about Thai industries, Thailand's CEOs and manufacturers published in multiple languages of CLMV countries (Cambodia, Laos, Myanmar and Vietnam), with creative technology in order to make sure that customers are getting the best solutions for business.

With more than 15-year experience in advertising media field, we are pleased to be a media partner for a variety of industrial groups and help move Thai industries forward to a sustainable growth in the age of Thailand 4.0; a new model driven by technologies and innovations. We will be the best media partner to make a commercial connection between vendors and buyers through marketing activities such as international exhibitions, road shows, seminars, business matching, etc. This will be a great opportunity to grow Thai industry to AEC markets. We are willing to inspire and motivate Thai entrepreneurs in industrial enterprises with excellent services and be a part of success to drive Thai industrial products and services to global industrial hub.
